Icons in a List

Using the power of **fixed-width** styling, we added some utility styling to handle HTML lists with icons used as decorative bullets.

Do More with Font Awesome Pro!

Upgrade now and rev up your productivity with more icons, styles, and tools.

We'll cover the basics of how to replace default bullets with icons in unordered lists and introduce options for customizing CSS properties.

Before You Get Started

Make sure you're:

- ✅ **Set up with Font Awesome** in your project.
- ✅ Familiar with the basics of **adding Font Awesome icons**.

Use `fa-ul` and `fa-li` to replace default bullets in unordered lists.

☑ List icons can
☑ be used to
⠏ replace bullets
☐ in lists

```
<ul class="fa-ul">
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>L
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>b
  <li><span class="fa-li"><i class="fa-solid fa-spinner fa-pulse"></i></sp
  <li><span class="fa-li"><i class="fa-regular fa-square"></i></span>in li
</ul>
```

You can also keep the semantics of an ordered list behind the scenes but use icon bullets visually.

☑ List icons can
☑ be used to
⠏ replace bullets
☐ in lists

```
<ol class="fa-ul">
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>L
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>b
  <li><span class="fa-li"><i class="fa-solid fa-spinner fa-pulse"></i></sp
  <li><span class="fa-li"><i class="fa-regular fa-square"></i></span>in li
</ol>
```

List Classes

Class	Details
fa-ul	Used on a `<ul>` or `<ol>` elements to style icons as list bullets
fa-li	Used on individual `<li>` elements to style icons as list bullets

Customization

We've added **CSS custom properties** ⬈ to make customizing easier and more efficient. Define your own values for the following properties to **override and customize** Font Awesome's defaults.

CSS Custom Property	Details	Accepted Values
`--fa-li-margin`	Set margin around icon	Any valid CSS `margin` **value** ⬈
`--fa-li-width`	Set width of icon	Any valid CSS `width` **value** ⬈

☑ List icons can
☑ be used to
⟳ replace bullets
☐   in lists

```
<ul class="fa-ul" style="--fa-li-width: 2em;">
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>L
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>b
  <li><span class="fa-li"><i class="fa-solid fa-spinner fa-pulse"></i></sp
  <li><span class="fa-li" style="--fa-li-width: 4em;"><i class="fa-regular
</ul>
```

☑ List icons can
☑ be used to
⟳ replace bullets
☐ in lists

```
<ul class="fa-ul" style="--fa-li-margin: 1em;">
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>L
  <li><span class="fa-li"><i class="fa-solid fa-check-square"></i></span>b
  <li><span class="fa-li"><i class="fa-solid fa-spinner fa-pulse"></i></sp
  <li><span class="fa-li" style="--fa-li-margin: 2em;"><i class="fa-regula
</ul>
```
